WELLNESS OF TOMORROW.

“ONLY SOMEONE WHO REALLY UNDERSTANDS CUSTOMER NEEDS CAN ACHIEVE LASTING SATISFACTION.”

Quality is a promise.

For years, the highest level of quality, reliability and durability have been the reason why customers buy control units and heaters from **sentiotec**. Our sauna accessories, peeling salts and selected sauna fragrances are also very popular.

Our new product line, **domo by sentiotec**, now provides the same qualities. Solid wood saunas

and element cabins have far more to offer than just a timeless design. Whether you choose a standard model or a customer-fabricated Style or Carat model just for your needs. Each sauna is made in our own factory and individually fitted with the best heaters and controls. You will find each one a real delight.

sentiotec – wellness of tomorrow

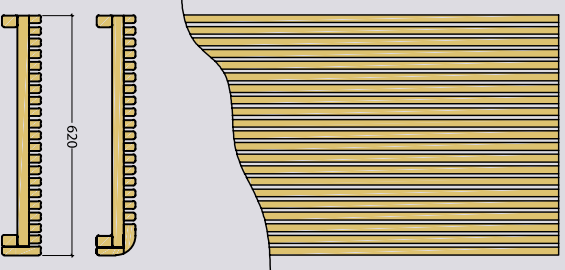

Dipl.-Ing. **Friedrich Niederdorfer**, MBA

Customised sauna

Style solid wood sauna 30

Carat element sauna 33

Lava garden sauna 37

Customised Style

CUSTOM SIZE SAUNA & INFRARED

Do you need a special size?

- With a particular height and variable floor space?
- And integrated sloping ceiling?
- With a glass front and a really attractive interior design?

We can make your dream cabin come true!

Delivery scope (included in rm-price):

- Cabin made of solid spruce 40 mm
- ESG full glass door 8 mm incl. lime wood door handle
- Prestige interior made of lime wood
 - 2 x 62 cm wide benches
 - When cabin depth is 180 cm or more, also includes: corner bench 62 cm wide
 - 1 – 2 head rests
 - Ventilation slides
 - Back rests
 - Intermediate bench panel
 - Heater safety guard
 - Floor grid
 - Lamp protection with lamp, no bulb

Technical data:

- 3 m silicon cables 5 x 1.5 mm² for sauna heater
- Solid roof element with roof rim
- Assembly material and instructions

Customised Style

CUSTOM SIZE SAUNA & INFRARED

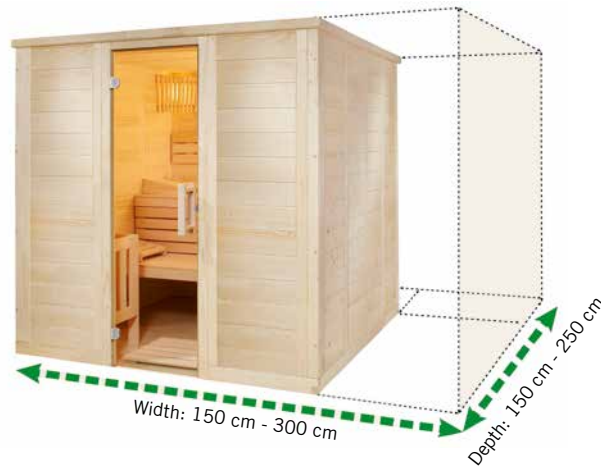

Do you need a special size?

Height: 204 cm - 220 cm

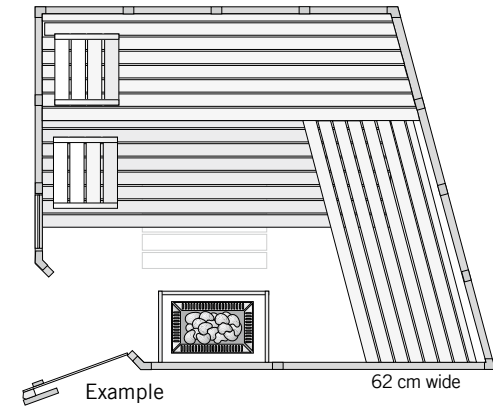

Width: 150 cm - 300 cm

Depth: 150 cm - 250 cm

Caution: the order size is the existing lateral dimension less 5 cm space to the wall

Your base is skewed.

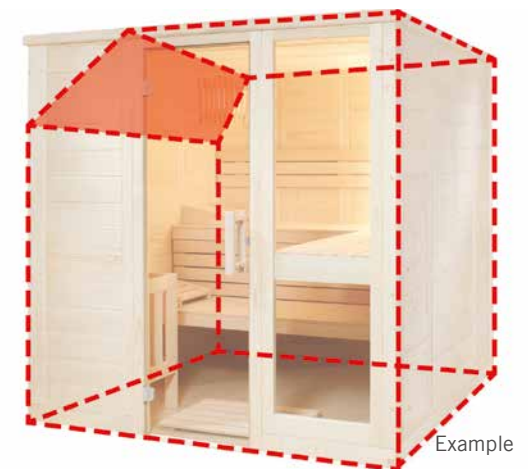

You want more height.

In centimetre increments up to a height of 220 cm

Sloping ceiling.

Customised Style

CUSTOM SIZE SAUNA & INFRARED

Interiors.

Prestige interior made of lime wood
Bench width: 62 cm included in
the standard scope of delivery

Emotion interior made of lime wood
Bench width: 62 cm
Extra charge: adjustable bench

Calculation examples for glass element
(assumed cabin height of 214 cm).

Glass element with at least half cabin height:

The glass element width is multiplied by the total cabin height

Example for glass element: 47 cm (w) x 115 cm (h)
Result: 47 cm x 214 cm = 1.01 m²

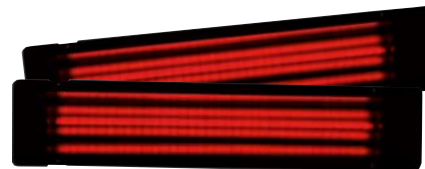

Glass element with less than half the cabin height:

The glass element width is multiplied by half the cabin height

Example for glass element: 51cm (w) x 93 cm (h)
Result: 51 cm x 107 cm = 0.55 m²

Optional equipment: deep infrared warmth

Two IR full-spectrum lamps (each 500 W),
Control unit, frame and installation

Calculation example for glass front
(Assumed cabin height of 214 cm).

The overall cabin width is multiplied by the overall cabin height and the glass door surface of 1.2 m² is then subtracted from the result.

Example for glass front: 257 cm (w) x 214 cm (h)
Result: (257 cm x 214 cm) – 1.2 m² = 4.3 m²

Additional options.

- Suspended ceiling (for example, for indirect lighting)
- Bronze or clear glass door
- Dimensions of the glass door and front can be freely selected
- Floor grid made to measure

For more information on custom products, see our price list.

Customised Carat

CUSTOM SIZE SAUNA & INFRARED

- Optional: Wipe-down socket

Carat made of hemlock wood, prestige interior and wipe-down socket.

Effect of the infrared radiation

HOW YOUR SAUNA BECOMES MULTIFUNCTIONAL

How infrared heat can promote health.

Using infrared radiation, the heat is transferred directly to the body with no physical contact. It is the same principle we are familiar with from how the sun works. The heat is absorbed by the skin and passes directly to the underlying layers. It thus enters the bloodstream and into the body setting a process in motion, the positive effects of which are undisputed.

After just a few minutes the body begins to perspire strongly and rid itself of harmful toxins. Metabolism, immune system and circulation are stimulated and the skin, connective tissue and the whole organism is better supplied with oxygen. The muscles also begin to relax.

Heat applications have been used for thousands of years. This contributes greatly to the improvement of physical well-being and to activation of the self-healing powers of the body. However, this is no substitute for a doctor or necessary therapy.

Infrared promotes

- Blood flow
- Detoxification
- Metabolism
- Circulation
- Regeneration
- Care for skin
- Psychological well-being

Infrared helps with

- Before and after exercise
- Rheumatism
- Headaches and migraines
- Cellulite
- Muscle tension
- Metabolic diseases
- Sleep disorders

Warranty conditions

sentiotec GmbH is convinced of the quality of its products, and we want you to benefit from them in the future!

We provide a five-year warranty for private use on all of our sentiotec sauna line controllers. For commercial installations, the warranty is two years. For the control units in the hotline sauna line and for all sauna heaters, the manufacturer's warranty is two years.

Requirement for this guarantee:

- The control units have been installed by an authorised specialist company;
- The devices are operated according to the **sentiotec** operating manuals;
- The warranty claim is received by **sentiotec** within the warranty period.

Excluded from the warranty are:

- Deficiencies or damage that is caused by non-intended use;
- All consumable materials and consumable objects, such as heating elements, etc.

The warranty period starts from the date of invoice of the cabin manufacturer. A requirement is the presentation of the original invoice. If no original invoice is available, the month of manufacture, noted on the nameplate of the product, is used as the basis for the start of the warranty period. The warranty period is neither extended nor renewed by warranty services.

The five-year warranty is an addition to the terms and conditions of **sentiotec GmbH**.

Clarification of icons

Solid cabin

40 mm block plank, planed on both sides, made of solid spruce, prefabricated to elements (for infrared thickness 28 mm)

Glossy glass door

6 or 8 mm thick toughened safety glass, including door seal, door hinges, door handle and door latch, left side attachment

IR full-spectrum light

Control unit for IR lamp

up to a total of 1 kW
