

**Welcome
to the comfort zone**

HARVIA

The most comfortable yard of the summer

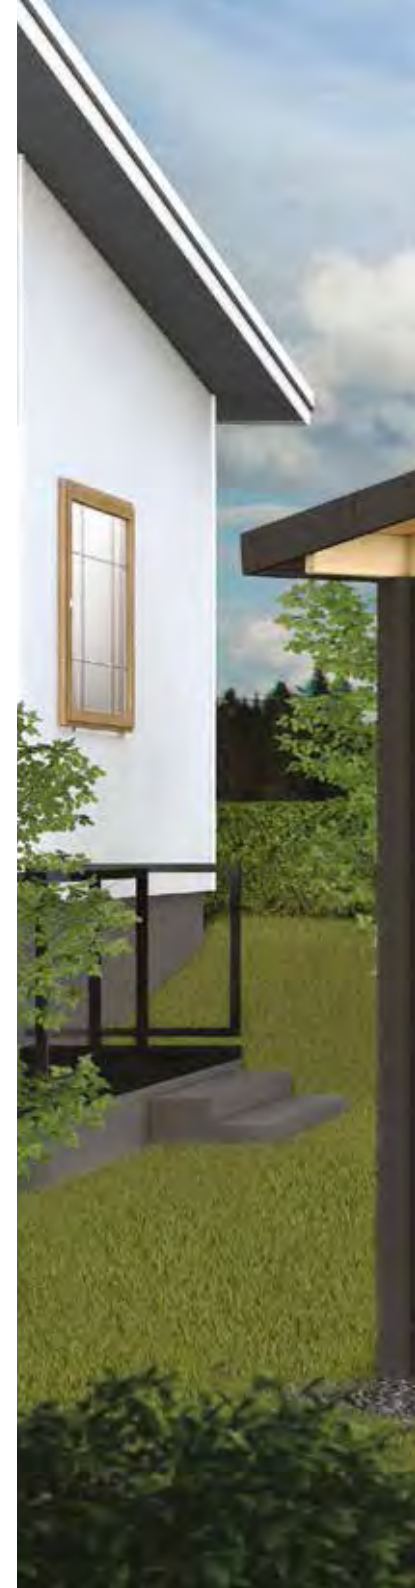

Enjoy a modern cottage feel and spend the summer relaxing. Build your own, particularly cozy comfort zone in your own yard, equipped with an outdoor kitchen, tub or Jacuzzi.

The Harvia Solide design sauna brings the cottage feel to your yard, even if you live in the centre of a city. Make your yard into the best place for your entire family to spend time in. This modern yard sauna will be the heart that warms up the comfort zone in your yard, inviting you to spend time with your loved ones.

A new dimension to your home

The Harvia Solide design sauna provides you with a new way of enjoying your home. This unique design sauna is much more than an ordinary yard sauna. The sleek and simple design also fits in well with the look of new residential areas. You can paint the exterior of the sauna to match the colour of the house or leave it in its original pale-coloured spruce, which is given contrast by the stylish black details. The Harvia Solide design sauna is available in three sizes, which allows you to choose the solution most suitable for your yard.

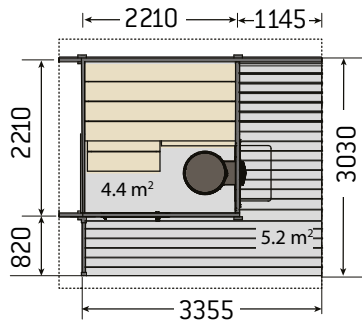

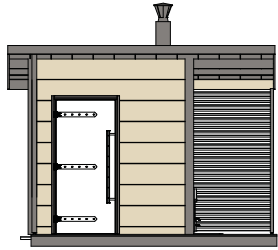

For those who appreciate Design

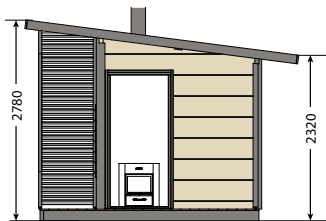

The Harvia Solide design sauna combines the age-old sauna tradition with a fresh and modern design. The sauna's design is the handiwork of the sauna factory's director, Vesa Vehmaa, who has many years of experience in the product development of saunas and sauna benches.

In this design sauna, the heater chamber is filled with wood from the outside, which allows the chamber to be used as a fireplace on the other side. The Duo glass wall, made of translucent white satin glass, serves as a beautiful interior element in the Harvia Solide design sauna while also transmitting light and warmth from the sauna to the sitting room.

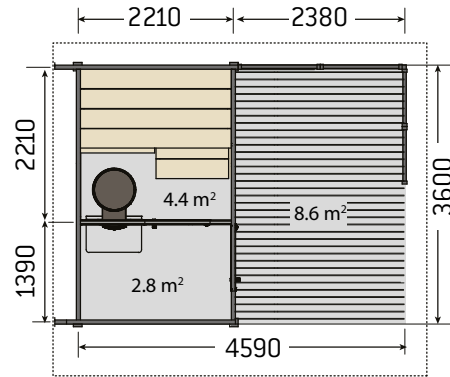

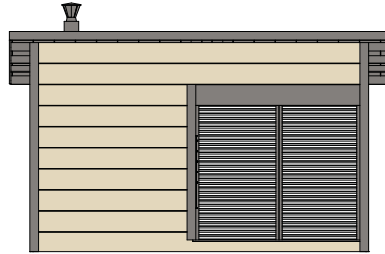

SLD01PS

most suitable
for you

Complete your home with a sauna

If your yard has limited space or no space at all: The Harvia Solide design sauna is also available as an indoor sauna. The rich combination of pale-coloured spruce and black colour is also featured in the design sauna designed for indoor spaces. You can also choose to furnish your sauna with the beautiful Duo glass wall, which emits light and warmth, and pick the bench solution of your choice.
